**EN**

Congratulations on your purchase of the product brand HECHT. Before the first operation, please read the owner's manual carefully!

CS

Gratulujeme Vám k nákupu výrobku značky HECHT. Před prvním uvedením do provozu si prosím pozorně přečtěte tento návod k obsluze!

SK

Gratulujeme Vám k nákupu výrobku značky HECHT. Pred prvým uvedením do prevádzky si prosím pozorne prečítajte tento návod na obsluhu!

PL

Gratulujemy zakupu produktu marki HECHT. Przed pierwszym użyciem należy dokładnie przeczytać instrukcję obsługi!

HU

Köszönjük Önnek, hogy megvásárolta a HECHT márkájú terméket! A készülék első üzembe helyezése előtt figyelmesen olvassa el ezt a használati útmutatót!

EN This manual contains important information about safety, installation, operation, maintenance, storage, and troubleshooting. Keep this manual in a safe place to be able to find information in the future or for other users. Given the constant technological development and adaptation to the latest exacting standards of the EU technical and design changes may be carried out without prior notice. Photographs are for illustrative purposes only, and may not exactly match the product itself. It is not possible to exercise any legal claims associated with this operator's manual. In case of doubt, contact the importer or retailer.

CS Tento návod obsahuje důležité informace o bezpečnosti, montáži, provozu, údržbě, uskladnění a řešení případných problémů, proto jej dobře uschovejte pro možnost vyhledání informací v budoucnu a pro další uživatele. Vzhledem k stálemu vývoji a přizpůsobování nejnovějším náročným normám EU mohou být na výrobčích prováděny technické a optické změny bez předchozího upozornění. Fotografie použité v manuálu jsou pouze ilustrační a nemusí se přesně shodovat s dodaným výrobkem. Nelze uplatňovat jakékoli právní nároky související s tímto návodom k obsluze. V případě nejasnosti kontaktujte dovozce nebo prodejce.

SK Tento návod obsahuje dôležité informácie o bezpečnosti, montáži, prevádzke, údržbe, uskladnení a riešení prípadných problémov, preto ho dobre uschovajte pre možnosť vyhľadania informácií v budúcnosti a pre ďalších užívateľov. Vzhľadom k stálemu technickému vývoju a prispôsobovaniu najnovším náročným normám EÚ môžu byť robené technické a optické zmeny bez predchádzajúceho upozornenia. Fotografie použité v manuále sú len ilustračné a nemusia sa presne zhodovať s dodaným výrobkom. Nie je možné uplatňovať akékoľvek právne nároky súvisiace s týmto návodom k obsluhe. V prípade nejasnosti kontaktujte dovozcu alebo predajcu.

PL Przedkładana instrukcja zawiera ważne informacje dotyczące bezpieczeństwa, montażu, eksploatacji, konserwacji, przechowywania oraz usuwania ewentualnych usterek. W związku z tym instrukcję należy odpowiednio przechować w celu umożliwienia wyszukania informacji w przyszłości oraz dla jej stosowania przez dalszych użytkowników. Ze względu na ciągły rozwój oraz proces dostosowywania do najnowszych, wymagających norm Unii Europejskiej, w wyrobach mogą być wprowadzone zmiany techniczne i graficzne bez wcześniejszego zawiadamiania. Fotografie zastosowane w instrukcji mają jedynie charakter obrazowy i nie muszą dokładnie zgadzać się z dostarczoną maszyną. Wykluczone są jakiekolwiek roszczenia prawne związane z przedkładaną instrukcją obsługi. W przypadku wątpliwości należy kontaktować się z importerem lub ze sprzedawcą.

HU A jelen használati útmutató fontos biztonsági, szerelési, üzemeltetési, karbantartási, tárolási és hibaelhárítási információkat tartalmaz. Az útmutatót őrizze meg, továbbá azt a berendezés egyéb felhasználóinak is adja át. A folyamatos modernizálás, a technológia fejlesztések, valamint az EK előírásainak való megfelelés miatt a termékek műszaki tulajdonságait és kivitelét előzetes bejelentés nélkül is meg változtathatjuk. Az útmutatóban használt képek csak tájékoztató jellegűek, azok elérhetnek a ténylegesen megvásárolt terméktől. A használati útmutatóval kapcsolatban minden jogi igényt elutasítunk. Bizonytalanság esetén vegye fel a kapcsolatot a gép importőrével vagy eladójával.

Notes on types of warnings in the manual :

⚠ Warning! This mark indicates instructions which must be followed in order to prevent accidents which could lead to serious bodily injury or death and / or it leads to mechanical failure, breakdown, or damage.

! Note: This mark indicates hints of directions useful in the use of the product.

SAFETY INSTRUCTIONS

 Before you put this machine into operation you have to read instructions in this manual.

Read these instructions before initial operation. Pay special attention to the safety instructions. If you notice transport damage or while unpacking, notify your supplier immediately. Do not operate the machine!

SPECIFIED CONDITIONS OF USE

This appliance is approved solely for use

- in accordance with description and safety instructions specified in this user's manual
- The equipment is specified for use only for the cutting and trimming of hedges, bushes and ornamental shrubs

Any other use is not as intended. Improper use is not covered by the warranty and the manufacturer will reject any liability. The user is liable for all damage caused to third parties and their property. Unauthorized modifications made to machine rule out any liability on the part of the manufacturer for damage resulting therefrom.

Please note that our equipment has not been designed for use in commercial, trade or industrial applications. Our warranty will be voided if the machine is used in commercial, trade or industrial businesses or for equivalent purposes.

Do not overload machine – use it only within the performance range it was designed for.

GENERAL SAFETY INSTRUCTIONS

 When using this machine, observe the following safety instructions to exclude the risk of personal injury or material damage. Please also observe the special safety instructions in the respective chapters. Where applicable, follow the legal directives or regulations for the prevention of accidents pertaining to the use of machine.

 **WARNING!** When using this machine, basic safety precautions, including the following, should always be followed to reduce the risk of serious personal injury and/or damage to the unit.

 **WARNING:** This machine produces an electromagnetic field during operation. This field may under some circumstances interfere with active or passive medical implants. To reduce the risk of serious or fatal injury, we recommend persons with medical implants to consult their physician and the medical implant manufacturer before operating this machine.

TRAINING

 The operators must receive proper training in the use, adjustment and operation of the machine, including prohibited operations.

- Read the instructions carefully. Be familiar with the controls and the proper use of the equipment. Spend a few moments to familiarize yourself with your machine before each use.
- Never allow children or people unfamiliar with these instructions to use the machine. Local

regulations can restrict the age of the operator.

- This machine is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the machine by a person responsible for their safety.
- Never work while people, especially children, or pets are nearby.
- Keep in mind that the operator or user is responsible for accidents or hazards occurring to other people or their property.

WORK AREA

- Keep work area clean and well lit. Cluttered and dark areas invite accidents.
- Check the landscape where the machine will be used and remove all objects, which could be caught and thrown away. Damage of the machine or operator's injury could be caused.
- Do not operate this machine in explosive atmospheres, such as in the presence of flammable liquids, gases, or dust. Machine create sparks which may ignite the dust or fumes.
- Keep children and bystanders away while operating the machine. Distractions can cause you to lose control.

ELECTRICAL SAFETY

⚠ Caution! Do not touch the damaged cable and pull the mains plug when the cable is damaged while working. Damaged cables increase the risk of an electric shock. If the power supply is damaged, it must be immediately replaced with a cable without defect, to avoid dangerous situations.

- Do not expose this machine to the rain not even do not use this machine in dampness and wet. Keep good lighting on the work place.
- Do not use the machine in place, where is the danger of fire or explosion.
- Protect yourself against the electric shock.
- Do not carry or manipulate the machine by the power cord, do not pull up the socket inlet from the socket outlet by pulling the power cord. Protect the power cord against heat, grease, aggressive liquids and sharp edges.
- Pull up the socket inlet from the socket outlet before every adjustment, repair or maintenance.
- Check the power cord regularly and check, if there are not marks of damage or ageing.
- If the power cord is damaged, let it have changed in accredited service to prevent the danger.
- Do not connect the damaged power cord into the supply and do not touch the damaged cable before its disconnection of the supply. The damaged power cord could lead to the contact with lively parts.
- Work only in such place, which you can reach safely. Allways keep stationary position and balance.
- Avoid unintentional startup. When carrying the machine, always unplug the mains plug. When connecting plugs to the socket, make sure the switch is turned off.
- Check the damaged parts. Before the next using of the device it is necessary to survey the damaged protection covers and other parts to judge, if the parts can continue to perform their duty. Check adjustment of moving parts and their moveability, concentrate on cracks and broken parts, fixation and other circumstances, which could threaten their duty. Protection cover or another part, which is damaged, must be repaired or changed by accredited service. Defective switch must be changed in accredited service.
- Do not use this machine if it is impossible to turn it on/of by the switch.
- Do not use this machine if the power cord is damaged or magged.

• This electric device is constructed in accordance with all valid safety regulations, which relate to it. All repairs must be made only by qualified persons and only original spare parts can be used. It can come to serious danger for the user in another case.

• Disconnect the supply (by pulling out the plug from the socket for example):

 Always, when the machine is without supervision

 Before eliminating of blocking

 Before checking, cleaning or work on the machine

 After crash into another subject

 Always, when the machine begins vibrate unreasonably

 When transporting

IMPORTANT SAFETY INSTRUCTIONS FOR BATTERY

 **The battery is not fully charged when you first receive it. First read the safety instructions below the follow charging notes and procedures.**

Read all instructions carefully and keep in a safe place for future reference.

- The battery must be fully charged at the first time.
- Ensure the switch is in the off position before inserting battery pack. Inserting the battery pack into machines that have the switch on invites accidents.
- We recommend to disconnect the battery from machine, if the machine is not used. That prevents the spontaneous discharge of the battery.
- Do not incinerate the battery even if it is severely damaged or is completely worn out. The battery can explode in a fire.
- Do not use the battery pack if it is damaged and liquid is leaked from the battery pack cells. However, if the outer seal is broken and this leakage gets on your skin, wash quickly with soap and water. If it's necessary seek medical help.
- If battery liquid gets in your eyes, flush them with clean water for a minimum of minutes. Seek immediate medical attention.
- Never use damaged, defective or deformed accumulators. Never open or damage the accumulator or let it fall on the ground.
- In the event of improper use of the battery pack, there is a risk of escaping hazardous vapours. Always ensure proper ventilation and immediately consult a doctor, if you feel unwell. The vapours might irritate the respiratory track.
- Batteries can explode in the presence of a source of ignition, such as a pilot light. To reduce the risk of serious personal injury, never use any cordless product in the presence of an open flame. An exploded battery can propel debris and chemicals. If exposed, flush with water immediately.
- Do not connect the positive pole and the negative pole of the battery with any metal objects. Battery could be short circuited causing damage to the battery and possibly causing severe burns or fire.
- When battery pack is not in use, keep it away from other metal objects like paper clips, coins, keys, nails, screws, or other small metal objects that can make a connection from one terminal to another. Shorting the battery terminals together may cause burns or a fire.
- Charge the battery only in the chargers supplied with the product.
- Do not open the battery. Danger of short-circuiting.
- Do not expose battery to rain or moisture.
- Dead batteries do not belong in household waste.
- Occasionally clean the venting slots of the battery using a soft, clean and dry brush.
- Protect the battery against heat, e. g., against continuous intense sunlight, fire, water, and moisture. Danger of explosion.

- Do not store or use the battery in locations where the temperature may reach or exceed 50°C (such as outside sheds or metal buildings in summer). Do not leave the battery in the car in summer.
- Replace the battery (accumulator) for original one every 12 months, preferably do this before the beginning of new season.

IMPORTANT SAFETY INSTRUCTIONS FOR BATTERY CHARGING

Before charging, and before each use, inspect the charger, cable and plug. In case you find damage, do not use the charger. Repairs performed by a specialist. Never open!

Before using charger, read all instructions and cautionary markings on charger, battery pack, and product using battery pack.

⚠ DANGER: Do not probe with conductive objects. Danger of electric shock or electrocution.

- The charger and battery are specifically designed to work together. Any other uses may result in risk of fire, electric shock or electrocution. Enclosed charger and battery are specifically designed to work together.
- DO NOT attempt to charge the battery with any chargers other than the ones in this manual.
- Do not expose charger to rain, snow or moisture. Penetration of water in the battery charger increases the risk of an electric shock.
- Risk of fire! Never charge the battery near acids and highly flammable materials.
- Do not leave the equipment unattended while it is operating, to avoid the risk of fire, burns and electric shocks.
- To reduce risk of damage to electric plug and cord, disconnect from mains socket by pulling the plug rather than the cord.
- Make sure cord is located so that it will not be stepped on, tripped over, or otherwise subjected to damage or stress.
- Place the charger in position away from any heat source.
- Do not operate the battery charger on easily inflammable surfaces (e. g., paper, textiles, etc.) or surroundings. The heating of the battery charger during the charging process can pose a fire hazard.
- Do not place any object on top of charger or on a surface that might block the ventilation slots and result in excessive internal heat. Place the charger in position away from any heat source.
- Never use a damaged charger. Damaged battery chargers, cables and plugs increase the risk of an electric shock
- Do not disassemble charger. Take it to authorized service center when service or repair is required. Incorrect reassemble may result in a risk of electric shock, electrocution or fire.
- Keep the battery charger clean. Contamination can lead to danger of an electric shock.
- Do not store or use the tool in locations where the temperature may reach or exceed 50°C (such as outside sheds or metal buildings in summer).
- The charger is designed to operate on standard household electrical power (230 V / 50 Hz). Do not attempt to use it on any other voltage!

PERSONAL SAFETY

- This machine is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the machine by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the machine.
- Stay alert, watch what you are doing and use common sense when operating this machine.

- Do not use this machine while you are tired, ill or under the influence of drugs, alcohol, or medication, or during pregnancy. A moment of inattention while operating this machine can cause you to lose control and may result in serious personal injury.
- Do not overreach. Keep proper footing and balance at all times. This enables better control of the tool in unexpected situations.
- Remove any adjusting key or wrench before turning the machine on. A wrench or a key that is left attached to a rotating part of the machine may result in personal injury.
- Use safety equipment. Always wear eye protection. Safety equipment such as a dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.
- Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts. Loose clothes, jewellery or long hair can be caught in moving parts.
- Prolonged use of the machine may lead to disorders of blood circulation in hands caused by vibration. These effects can be worsened by low ambient temperatures and/or by gripping the handgrips excessively tightly. Period of use you can extend with appropriate gloves or regular breaks. Take frequent work breaks. Limit the amount of exposure per day.

PERSON PROTECTION

 **Be prepared! Have about one following things at least:**

- Suitable fire extinguisher (CO₂ or Dry Powder). .
- Fully equipped first-aid kit, available easily for machine operator and accompanying person. It should contain enough pieces of bandage for lacerated/cutting wounds.
- Mobile phone or another device for quick calling of rescue service.

 **Don't work alone. There must be around another person who knows principles of the first aid.**

 **The accompanying person must keep safe separation distance from your workplace, but he/she must be able to see you the whole time! Work only on such places where you are able to call the rescue service quickly!**

- In case of any injury always proceed in accordance with the principles of first aid.
- If someone is cut, cover the wound with a clean cloth and press hard to stop the flow of blood.
- If battery liquid gets on your skin, wash quickly with soap and water. If it's necessary seek medical help.
- If battery liquid gets in your eyes flush them with clean water for a minimum of minutes and seek immediate medical attention.
- Individuals with poor circulation who are exposed to excessive vibration may experience injury to blood vessels or the nervous system. Vibration may cause the following symptoms to occur in the fingers, hands or wrists: "Falling asleep" (numbness), tingling, pain, stabbing sensation, alteration of skin colour or of the skin. If any of these symptoms occur, see a physician!

Put safety first in the case of fire:

- If fire comes from the motor or smoke appears, turn off the machine, disconnect power supply and distance yourself from the product to ensure your physical safety.
- Use dry powder fire extinguisher on the fire to prevent it from spreading.
- A panicked reaction could result in the fire and other damage becoming more extensive.

RESIDUAL RISKS

- Even if the device is used according to instructions, it's impossible to eliminate all the risks associated with its operation. The following risks may occur arising from device construction:
- Mechanical hazard, caused by cut and throw off.
- Electrical hazard caused by touch with parts under high voltage (direct contact) or with parts, which came under a high voltage due to failure of the device (indirect contact).
- Heat hazard resulting in burning or scalding and other injuries caused by possible contact with high temperature objects or materials including heat sources.
- Noise risk resulting in loss of hearing (deafness) and other physiological disorders (e.g. loss of balance, loss of consciousness).
- Vibration risk (resulting in vascular and neurological harm in the hand-arm system, for example so called "white finger disease").
- Dangers caused by contact with harmful liquids, gas, mist, smoke and dust or by their inhalation, relate to emissions (for example breathing in).
- Danger of fire or explosion relate to spilling of fuel.
- Dangers caused by failing in ergonomic principles by construction of the machine, for example dangers caused by unhealthy position of body or excessive overcharge and unnature to the anatomy of the human hand-arm, relate to construction of handle, equilibrium of the machine and using of toothrest.
- Dangers caused by unexpected starting, unexpected exceeding of engine revs caused by defect/failure of control system, relate to the defects by the handle and placing of drivers.
- Dangers caused by impossibility to stop the machine in best conditions, relate to solidity of the handle and placing of engine shut down device.
- Dangers caused by defect of machine control system, relate to solidity of the handle, placing of drivers and marking.
- Dangers caused by tearing (of the chain) during running.
- Dangers caused by shooting up of subjects or splashing of liquids.

UNPACKING

- Carefully remove the product from the box.
- Carefully inspect all parts. If any part is damaged or missing, contact your dealer or authorized service center.
- Do not throw away packaging materials until you have not reviewed carefully if they did not remain a part of the product.
- Parts of the packaging (plastic bags, paper clips, etc.) do not leave within reach of children, could be a possible source of danger. Do not let children play with plastic bags, foils or small parts. There is a danger of swallowing or suffocating!
- Disposal must be made in accordance with the regulations in force in the country in which the equipment was installed.
- Make sure that bags and containers of plastic material are left strewn freely in the environment because they pollute it.
- If you have any doubt do not use the machine, but have it checked by an authorized service center.

BATTERY AND CHARGER : It is not included packing

⚠ This product requires assembly. The device must be assembled correctly before use.

If you notice transport damage or while unpacking, notify your supplier immediately. Do not operate the machine! We recommend save the package for future use. The packaging materials must still be recycled or disposed of in compliance with the relevant legislation. Sort different

parts of the packaging according to material and hand it to the appropriate collection sites. For further information contact your local administration.

FITTING INSTRUCTIONS

- Unpack the device and check whether delivery is complete.
- Slide the hand protection onto the equipment and affix the side of the unit with the two bolts included in delivery.

SWITCHING ON AND OFF

INSERT/REMOVE THE BATTERY PACK (PIC.B,C)

1. To insert the battery press the battery lock down and slide the battery into the guide rails of the machine.
2. To remove the battery from the machine, battery lock down and pull out the battery.

SWITCHING

- Before starting your hedge trimmer remove blade sheath
- Hook the extension cable over the belt clip and attach it to your trouser belt.
- Push the On switch on the rear grip and hold the safety switch on the front handle at the same time to switch the unit on. The hedge trimmer will be run at maximum speed.
- Release one of the two switches to switch the trimmer off.

 **WARNING!** After switching off the blades still moving for a while. Wait until they stops completely. Never touch or decelerate the moving blades. Danger of injury!

RECHARGING THE LI-ION BATTERY PACK

 The new battery is only partially charged. Before initial use, fully charge battery

- Recharge the accumulators in time, before they are discharged fully, otherwise the accumulators can be damaged permanently (irreversibly).
- Electronic control inside the battery prevents it from complete discharge and thus permanent damage. If the device turns off suddenly while being used, charge the battery.
- The lithium-ion battery can be charged in any state of charge, and the charging process can be interrupted at any time without harming the battery (no memory effect).
- Let a hot battery cartridge cool down before charging it.
- Charging and discharging cycle is controlled by electronic control integrated in the battery. While charging, if temperature of the battery exceeds the allowed maximum temperature (e. g. environmental influences), charging will be interrupted automatically. Let the battery cool and then repeat the charging cycle.
- The electronic control also prevents the battery from complete discharge which would damage it. If the voltage drops to minimum allowed limit, the electronic control disconnects the battery.
- Charge battery pack only with the charger provided.
- Make sure power supply is normal house voltage, 230 volts, 50 Hz, AC only.
- Charge the battery pack in a dry place with room temperature at 5°C do 40°C.
- Ensure that the outside surface of the battery is clean and dry before inserting into charger.
- While charging, the charger and the battery may become warm to touch; this is normal and does not indicate a problem.
- A significantly reduced working period after charging indicates that the battery is used and

must be replaced. Use only original batteries.

- The battery must not be fully discharged, otherwise it could be damaged and can not be recharged again.

WORKING WITH THE HEDGE

During cutting work, ensure that no contact is made with hard objects, e.g. such as wire fencing or main plant stems. This may result in damage to the cutter bar.

- Always work away from the mains power outlet. Set the cutting direction before starting work. Ensure that the power cable is kept well away from the working area. The belt clip included in the package for hooking up the extension cable will help you. Never lay the cable over the hedge, where it could easily be caught up in the trimmer blades.
- Avoid overstraining the equipment during work.

⚠ WARNING! Pull out the power plug immediately if the cable is damaged, badly twisted or has been completely cut through.

CUTTING TECHNIQUES

- Cut thick branches beforehand using a sawing or branch clippers.
- The double-sided cutter bar enables cutting in both directions or, with a swinging action, from one side to the other.
- In case of vertical cutting, move the hedge trimmer in a sickle-shaped movement to the edge of the hedge, so that cut branches fall to the ground.
- In order to achieve long straight lines, the placing of tensioned guiding cords is recommended. Reversible cutter bar allows you to cut both ways uniformly forward or up and down in an arc movement.
- In case of horizontal cutting, movement to the edge of the hedge, so that cut branches fall to the ground.
- In order to achieve long straight lines, the placing of tensioned guiding cords is recommended.

CUTTING SHAPED HEDGES

It is recommended that hedges be cut in a trapezoidal shape, in order to prevent stripping off of the lower branches. This corresponds to the natural plant growth and allows the hedge to thrive optimally. During cutting, only the new annual growths are reduced and thus a dense branching and a good screen will develop.

- Cut the sides of a hedge first. To do this, move the hedge trimmer in the direction of growth from bottom to top. If you cut down from the top, the thinner branches will move out, which may result in some areas having sparse growth or holes.
- Cut the top edge, according to taste, in a flat shape, roof shape or rounded shape
- Trim young plants to the required shape. The main growth should remain undamaged until the hedge has reached the planned height. All other shoots are lopped off to half size.

CARE OF FREE-GROWING HEDGES

Free-growing hedges are not shaped when cut, although they must be regularly maintained so the hedge does not become too high.

CUTTING TIMES

Deciduous hedges: June and October

Hedges of coniferous wood: April and August

Evergreen conifer hedges: from May

TRANSPORTATION

- When hand-carrying the product, cover over the cutting part if necessary, lift up the product and carry it paying attention to the blade.
- When transporting or storing the machine always fit the cutting device guard.

MAINTENANCE AND CLEANING

⚠ WARNING! Wear gloves while handling the blades.

Carry out the following maintenance and cleaning work regularly. This will guarantee a long and reliable service life.

- Before each use, check the hedge trimmer for obvious defects such as loose, worn or damaged parts. Check the secure seating of the bolts in the cutter bar.
- Do not use the unit if the blades are blunt or worn. This will overstress the motor and gearbox of the machine.
- Check condition of coverings and safety devices for damage and correct seating. Replace these where necessary.
- Keep the ventilation slots and motor housing of the device clean. Do not wash down the equipment with water, or submerge it in water.
- Do not use any cleaning agents or solvents. These could cause irreparable damage to the equipment. Chemical substances can attack the plastic parts of the equipment.
- Clean the cutter bar carefully after each use. Apply the lubricating and preservative oil.

SHARPENING

Always keep the file or sharpener at an angle of 45° (to the blade, and:

- Always grind in the direction of the cutting edge;
- NOTE: files cut only in one direction; lift the file from the blade when returning to start a new pass**
- Remove all burr from the edge of the blade with a slip stone;
 - Remove as little material as possible;
 - Before refitting the sharpened blades, remove burrs and filings and then apply grease.

Do not try to sharpen a damaged blade: change it or take it to a Service dealer.

TROUBLESHOOTING

❗ CAUTION Failures of your machine which require larger interference must always be eliminated by specialized workshop. Unauthorized interferences can cause damages. If you can not rectify the fault using the measures described here, contact an authorized service center.

Problem	Possible cause	Fault correction
Device does not start	On/Off switch defective	Repair by Service Centre
	Worn carbon brushes	
	Defective motor	

Device runs with interruptions	Internal loose electrical connection	Repair by Service Centre
	On/Off switch defective	
Low quality of the cut	Cutting bar is blunt	It is necessary to sharpen or change the cutting bar
Engine runs but the cutting bar does not move	The bar is blocked by the thick branch or an other objects	Shears off as soon as possible, unplug them from the socket and remove the object blocking the bar.

STORAGE

- Turn power off if the machine is not used.
- Oil the blade to prevent rust and fit the cutting device guard.
- Storage on a dry place out off the reach of children.
- When not in use, store the splitter so that it cannot be started by unauthorized persons.

⚠ WARNING! Do not store the machine unprotected outdoors or in a damp environment.

LI-ION BATTERY STORAGE

- Store the accumulators in a dry and dustfree room at the ambient temperature ranging preferably from 0°C to +25°C. The ideal storage temperature is 5°C.
- Never keep the Li-Ion battery discharged for a long time, if the voltage of cells drops under allowed limit due to self-discharge, it will lead to its damage. For maximum durability, store the battery charged up to maximal capacity of 50 – 80 % (2-3 control lights).
- Check the battery at least once in every 3 months and if the voltage drops below 40 % (1 control light), charge it up to 50 – 80 % immediately.
- Do not expose battery to rain or moisture.
- Do not store the battery in direct sunlight.
- Do not store or use the battery in locations where the temperature may reach or exceed 50°C (such as outside sheds or metal buildings in summer).
- Occasionally clean the venting slots of the battery using a soft, clean and dry brush.
- When battery pack is not in use, keep it away from other metal objects like paper clips, coins, keys, nails, screws, or other small metal objects that can make a connection from one terminal to another. Shorting the battery terminals together may cause burns or a fire.
- During the life of the battery it degrades and its capacity becomes lower. The lifetime can be prolonged significantly by proper charging and storage. If the battery capacity drops so much that it is no longer possible to fully use it, replace it with a new one.
- Replace the battery (accumulator) for original one every 12 months, preferably do this before the beginning of new season.

SERVICE AND SPARE PARTS

- Have your device serviced by a qualified repair personnel using only identical replacement parts. This will ensure that the safety of the device is maintained.
- Whether you need technical advice, repair, or genuine factory replacement parts, contact the HECHT authorized service nearest you. Information on service locations, visit www.hecht.cz

DISPOSAL

- Dispose your device, accessories and packaging in accordance with the requirements of environmental protection into the recycling collection center.
- This machine does not belong to the household waste. Save the environment and take this device to designated collection points where it will be received for free. For more information please contact your local authority or nearest collection point. Improper disposal may be punished according to national regulations.
- The battery contains toxic substances. Toxic materials must be disposed of in a specified manner in order to prevent contamination of the environment. Take used batteries to a recycling center. Do not throw the battery into household waste, fire or water.

GUARANTEE OF THE PRODUCT

- For this product we provide a legal warranty, legal responsibility from the defects, for 24 months from receipt.
- For corporate, commercial, municipal and other than private use is valid a quality-guarantee upon receipt for 6 months, for Briggs&Stratton engines is valid a quality-guarantee upon receipt for 90 days.
- All products are designed for home use, unless there is another information in the instruction manual or operation description. When using otherwise or in contradiction with instruction manual the claim is not recognized as legitimate.
- Inappropriate product selection and the fact that the product does not meet your requirements can not be a reason for complaint. Buyer is familiar with the properties of the product.
- Buyer has the right to ask the seller to check the functionality of the product and become familiar with its operation.
- A prerequisite for receiving warranty claims is that the guidelines for operating, servicing, cleaning, storage and maintenance were followed.
- Damage caused by natural wear and tear, overloading, improper use or intervention outside the authorized service during the warranty period, are excluded from the guarantee.
- Warranty does not cover wear and tear caused by the usual usage.
- Warranty does not cover wear and tear of components known as common consumables (eg. service charges, filters, blades, V-belts and toothed belts, chains, carbons, seals, spark plugs, bearings).
- From the warranty are excluded wear and tear of the product or parts caused by normal use of the product or parts of the product (eg low battery or reduce battery capacity after a period of usual life of 6 months) and other parts subject to natural wear and tear.
- By the goods sold at a lower price, the warranty does not cover defects for which the lower price was negotiated.
- Damage resulting from defects in material or manufacturer error will be eliminated free of charge by replacement delivery or repair. It is assumed that the product returns to our service center undismantled and with proof of purchase.
- Cleaning, maintenance, inspection and alignment tools aren't the warranty act and are paid services.
- For repairs that are not subject to warranty, you can have it repaired in our service center as paid service. Our service center will be happy to draw up a costs budget.
- We shall consider the products only that have been delivered clean, complete, in case of sending also packed sufficiently and paid. Products sent as unpaid, as bulky goods, express or by special shipping - will not be accepted.
- In case of justified warranty claim, please contact our service center. There you will receive additional

information on processing claims.

- Information about service locations see at www.hecht.cz
- We dispose of your old electrical appliances free of charge.

The noise was measured in accordance with the standards and provisions set forth in the conformity declaration. In the course of further development, technical and design changes may be carried out without prior notice. All the dimensions, guidelines and data contained in this manual are therefore not guaranteed. For this reason, it is not possible to exercise any legal claims associated with this operator's manual.
