Moth Trap

Without Light

SKU: IZMOTFPZZ

Thank you for purchasing this Skinner-type moth trap from the Nestbox Company.

The trap has been designed to slot together so it's easy and fast to put up without tools, and it can be quickly taken apart for transport or storage.

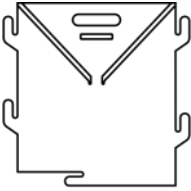

The moth trap is made of FSC[®] Certified exterior grade birch plywood. It has been left untreated to allow you to choose whether to leave it as it is, or apply paint, varnish or wood preservative. We would recommend applying something to the wood to protect it and extend its life.

This trap is supplied with a light board on which you can mount your own choice of light fitting and electrics.

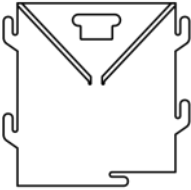

We hope you will enjoy many years of moth catching with this trap.

Assembly of the Moth Trap

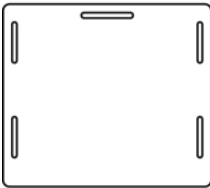

You will find the following parts in your moth trap:

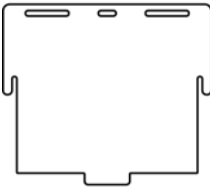

Left Side

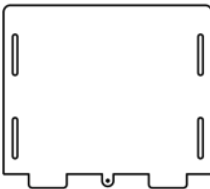

Right Side

Back

Base

Front

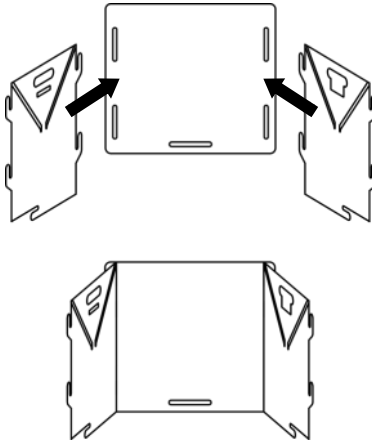

Light Board

X 2 Clear plastic panel for funnel

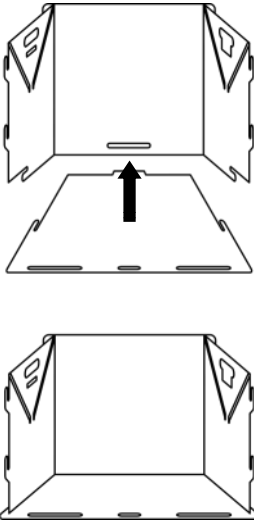

Security Clip

Stage 1.

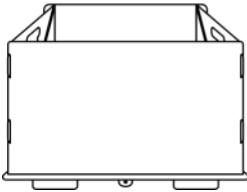

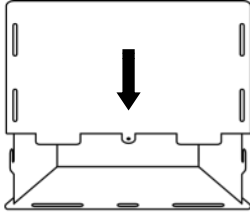

Take the **Left Side** and **Right Side** panels and attach them (with the grooves facing inwards) to the **Back** panel. To do this, push the hooks on the Side panels through the slots on the Back panel, then slide the Side panels upwards.

Stage 2.

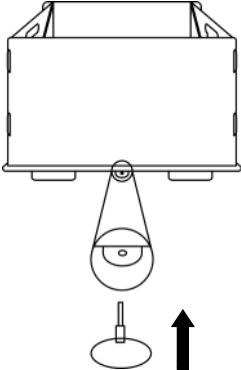

Slide the **Base** panel into the hooks at the bottom of the sides and push it back until the tab on the Base panel fits into the slot at the bottom of the Back panel.

Stage 3.

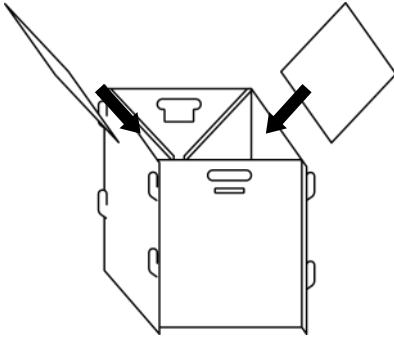

Take the **Front** panel and slide the hooks on the Side panels through the slots in the Front panel. Then slide the Front panel down so all 3 tabs on the bottom of the Front panel slide through the slots on the Base panel.

Stage 4.

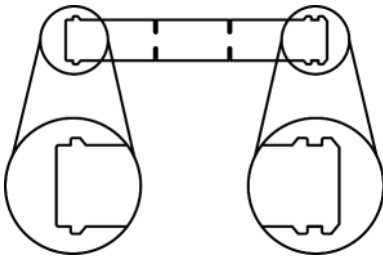

To lock all the panels in place, insert the pin of the **Security Clip** through the hole in the middle tab on the Front panel, and then flip the ring over the tab to secure the Clip in place.

Stage 5.

Take the **clear plastic panels** and slide them down the diagonal grooves in the Side panels.

Stage 6.

Fits into slot
in Left
Side panel

Fits below
handle on
Right
Side panel

The final stage is to fit the **Light Board** (with your light attached). This goes between the slots just below the handles on the Side panels. To fit, push the end of the Light Board into the slot in the Left Side panel and then drop the other end down just below the handle in the Right Side.

Warranty

The Nestbox Company Limited warrants all its products against defects in materials and manufacture for 6 months from the date of purchase. If a defect is discovered, the Nestbox Company will repair or replace the product free of charge.

The Nestbox Company Limited is not able to accept any responsibility for any loss, damage, or loss of data suffered by any customer or third party as a result of use, misuse or malfunction of the product or this User Guide.
